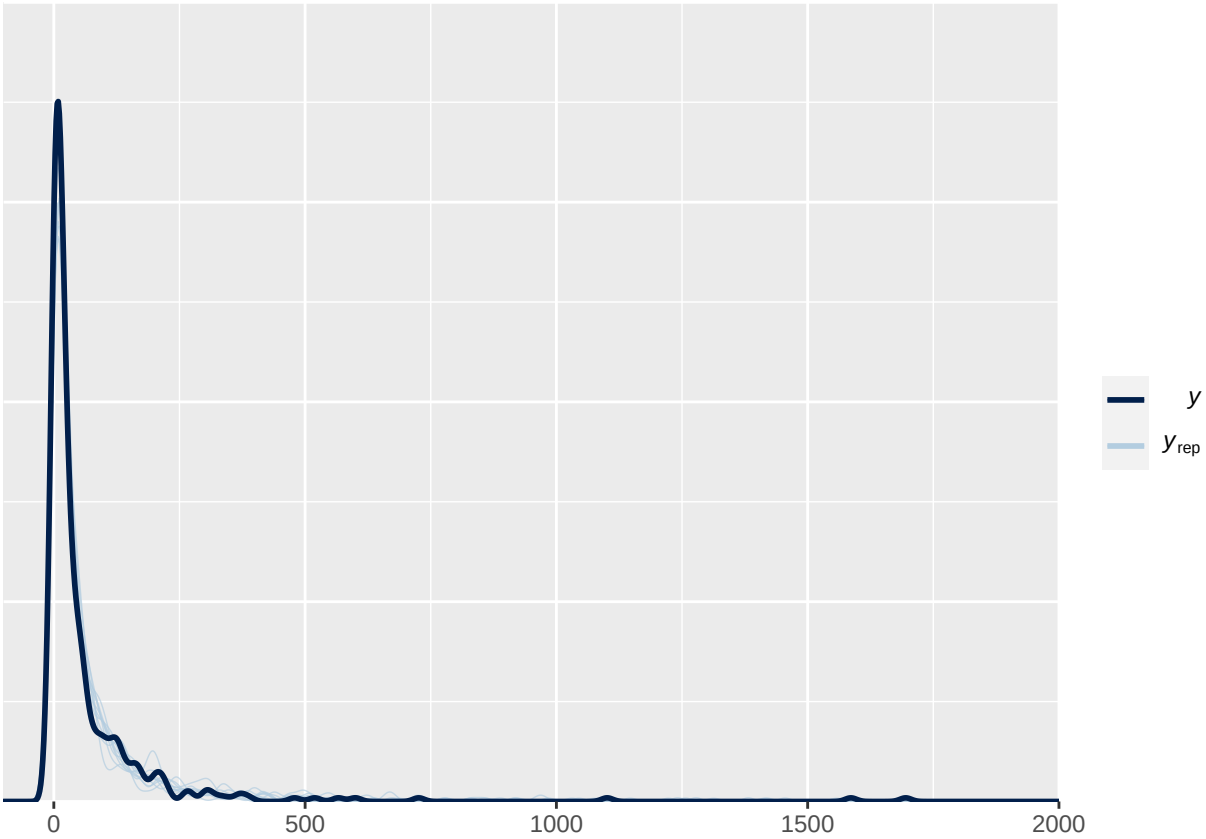
Untitled

Model 1

$$Visits/SelfingLevel + (1|net_id) + (1|gr(phylo, cov = A))$$

This model contains all both quatitative and qualitative data of selfing levels. The response variable is the integer of visits.



autonomous_selfing_level	estimate___	se___	lower___	upper___
high	18.66205	8.822497	7.36755	50.63038
medium	32.30017	16.338176	11.94566	86.60793
low	45.81416	19.927785	19.79993	110.28341
none	27.44296	10.985460	12.33089	61.10371
