

Quantitative traits		Qualitative traits		
Trait Type	Traits	Trait Type	Traits	Categories
Vegetative	Plant height (m)	Vegetative	Lifepan	Short-lived, perennial
			Life form	Herb, shrub, tree
	Flower width (mm)	Floral	Flower shape	Brush, campanulate, capitulum, open, papilionaceous, tubular
	Flower length (mm)		Flower symmetry	Actinomorphic, zygomorphic
	Inflorescence width (mm)		Nectar	Presence/absence
Floral	Style length (mm)		Autonomous selfing	None, low, medium, high
	Ovule number/flower	Reproductive	Compatibility system	Incompatible, partially compatible, compatible
	Flowers per plant		Breeding system	Hermaphrodite, monoecious, dioecious
	Nectar (μl)			
	Nectar (mg)			
Reproductive	Nectar concentration (%)			
	Pollen grains per flower			
	Autonomous selfing (fruit set)
